## User Manual

# 1Hydro Filtration Bottle

The **1Hydro Filtration Bottle** can remove 99.9999% of waterborne bacteria (>LOG 6 reduction), including E-Coli and 99.9% of waterborne protozoan parasites (>LOG 3 reduction), including Giardia & Cryptosporidium. Utilizing the BEST coconut activated carbon and hollow fibre UF membrane filter technology, it can soften the water and improve taste and odor.

### 1Hydro Filtration Bottle Features:

1. Water bottle with removable filter and integrated compass
2. Ideal for hiking, camping, travel and emergency preparedness
3. Compact and lightweight, made from BPA free ABS plastic
4. The hollow fibre UF membrane & coconut activated carbon can filter up 1,500 liters / 396 gallons
5. Easily replaceable filter straw
6. Shelf life of 5 years

### 1Hydro Filtration Bottle Usage:

1. After each use, blow out water from the filter to keep the filter clean and dry.
2. When flow decreases, remove and clean the filter by flushing water through the filter in the reverse direction. This should ensure water circulation is again maximized.
3. In order to ensure maximum filter life, do not use harsh soaps, detergents or other corrosive materials to clean the bottle or filter.
4. Do not filter liquids containing carbonic acid, flavors, sugars and others. This filter is designed specifically for filtering water.
5. Please blow air through filter before sucking in water each time.

\*Note: The activated carbon is pre-washed during the manufacturing process. However, there may still be a slight carbon coloration of the water on initial use. This is not harmful and will clear up after a few ounces of water.
