User Manual

Tri-Color Lens Pack

The **Tri-Color Lens Pack** includes a Red, Green and Blue filter that is compatible with the **TC1200 PRO Flashlight**.

Tri Color Lens Features:

- The Red filter emits a strong red light for emergency signals and is ideal for penetrating fog and smoke. Great for improved night vision.
- The Green filter is ideal for hunting (will help hide your location) and hiking and enhances night vision. The green filter provides the best visibility in a forest because it uses the lowest light intensity possible.
- The Blue filter is ideal for night hunting making it easier to find blood trails which will appear black in the light. Blue colored light also penetrates water which makes it a preferred form of light for night fishing.

To Use Tri-Color Lenses:

The Lenses are designed to snap over the existing clear lens.

Choose one of the Color Lenses (Red, Green or Blue) and place on the head of the flashlight. Press the color lens until it is secure.

Cautions:

- Do not look directly into the LED as this may cause damage to your eyes.
- This product is not a toy
- Contains small parts not suitable for children under 5 years of age

Customer Support:

To reach our customer support staff Monday through Friday 8am - 4pm PST, email support@1tac.com or call 877-616-3515, press option 2.
